

SEMINARIUM MATEMATYKA DYSKRETNA

wtorek, 22 listopada 2016 r. godz. 12.45, s. 304 A3-A4

SPANNING TREES OF GRAPHS AND BIPARTITE GRAPHS

Mikio Kano

Ibaraki University, Hitachi, Japan

Some sufficient conditions for a graph to have spanning trees with some properties can be weakened if we consider bipartite graphs. We present such results and also some current results on spanning trees of graphs.
